

ProjectPlaygrounds

The Ultimate Thermoplastic Playground Markings far superior to paint

**Transforming your old and tired
Playground into a World of
Colour, Education and lots of Fun!**

At Project Playgrounds we have a multitude of standard playground markings and games - from Chequerboards, Alphabet Snakes and Dragons to numbered Crocodiles and traditional Hopscotch - all fantastically colourful and manufactured to fit into the valuable playground space available to you.

Vibrant colour and above all durability are the key features of our product. The material is non-toxic, non-slip, UV stable, colourfast and extremely durable.

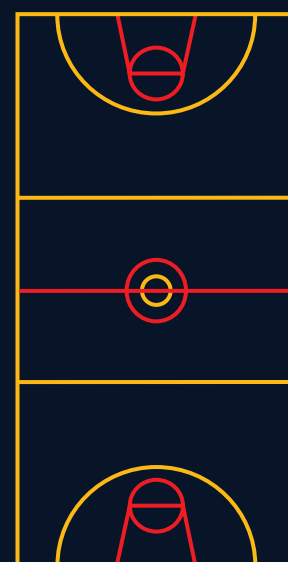

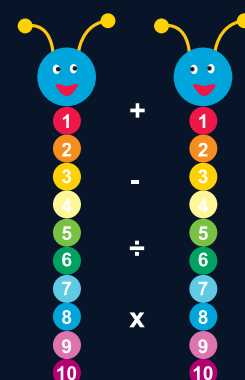

The material is applied to the tarmac surface using a propane burner and heated until it becomes one with bitumen or concrete. Once cool (approximately 10 minutes after application) the markings are immediately ready to use by the children - unlike paint or other forms of markings which take hours or even days to dry rendering play and recreational areas redundant for long periods of time.

We are happy to visit your school free of charge. We conduct a site survey and then supply you with a comprehensive playground drawing and quotation with all quotations broken into individual components so you can pick and choose what you prefer...

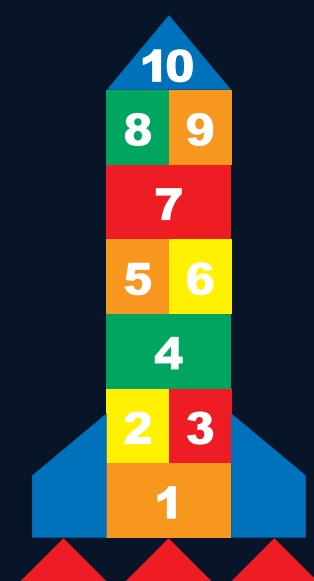

So easy

All playground design and quotations are supplied within
48 hours of a site survey.

90% of installations are completed in 1 day or less - all markings
are guaranteed and immediately useable by the children
(lead times apply)
