Laykold® is an acrylic sports surfacing system that can be customised to achieve the desired performance, playability and appearance, making it an incredibly cost-effective way to breathe new life into asphalt or concrete surfaces. It is easy to maintain, and re-coating can extend a court's playing life or transform it completely.

Laykold® is the official surface of the Miami Open and has been since 1984. It is a popular choice for community-funded facilities as they find new ways to increase utilisation and physical activity. The same systems are being installed at clubs and schools as they introduce a new generation of players into the sports through HotShot and NetSetGO.

Laykold® is manufactured by APT Asia Pacific in our ISO 9001 Certified factory in Melbourne. APT Asia Pacific is a global leader in the development and manufacture of innovative, high performance and environmentally-friendly sports and recreational surfacing systems. The complete range includes synthetic grass for every application as well as polyurethane-based surfaces for athletics, indoor gymnasium flooring, and children's playgrounds.
